## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by AU 708335. AU '335 discloses a process for the flotation separation of silicates from non-sulfidic minerals including phosphate [pg. 1, line 12 "apatite"] by employing various quaternary ammonium compounds including a preferred embodiment noted at pg. 5, lines 3-9.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over AU 708335 as applied to claim 1 above, and further in view of Uphues (US 5296622)- cited by applicant. Claim 5 is noted to include a process step of deriving the quaternary esteramine from methyldiethanolamine. Uphues '622 indicates that the use of triethanolamine (as taught by AU 708335) or methyldiethanolamine are known equivalents in the production of quaternary esteramines (col. 3, lines 60-65). As such it would have been obvious for one of ordinary skill to derive the recited esteramines from methyldiethanolamine as recited in claim 5.
